

Eligible NEVER EVER feeds list

This fact sheet provides a guide to raising and feeding cattle eligible for the Greenham NEVER EVER Beef Program.

Cattle consigned under Greenham's NEVER EVER Beef Program must not be fed grain or grain by-products, antibiotics (including ionophores e.g. rumensin), steroids or genetically modified organisms (GMOs) at all throughout their lives.

The consumption of hay, haylage, baleage, silage, forage products, cereal crop residue without grain and roughage while on pasture is not restricted under the NEVER EVER standards.

When considering which supplementary feed to use, consider the energy, protein, and fibre requirements of the cattle. An eligible diet must be derived solely from forage mixes consisting of:

- grasses (annual and perennial)
- forbs (e.g. legumes and brassica)
- browse
- cereal crops in a pre-grain state
- legumes (such as alfalfa, clover, peas) and brassica (such as beets, kale, turnips)
- hay, haylage, baleage, silage, crop residue without grain and other roughage sources.

The following list of approved supplements is not exhaustive. The list is periodically reviewed and updated. Supplements not listed below must be approved in advance by Greenham.

ELIGIBLE MINERAL SUPPLEMENTS

- | | |
|-----------------|---------------------|
| • molasses | Performance Feeds |
| GrainCorp | • AniPro Cattle and |
| • Molafos 15 | • MaxPro Cattle |
| • Molafos 15S | |
| • Molafos 20ss | BEC Feed Solutions |
| • Molafos 25sss | • Phosure 6, |
| • M8u | • Phosure 12, |
| • M4u | • Phospro 17 |
